School of Computing
RESEARCH ETHICS COMMITTEE

APPLICATION FORM FOR ETHICAL REVIEW OF A RESEARCH PROJECT INVOLVING HUMAN PARTICIPANTS WHICH IS IN THE CATEGORY OF NOTIFICATION ONLY

There are 3 generally accepted levels of ethical review for projects carried out in a University or similar setting. These are notification only, expediated and full committee.

This notification only level of review is to approve relatively low-risk research involving human participants, primarily using social science methodologies in which any personal information collected is not of a sensitive nature. The School of Computing Research Ethics Committee has been delegated responsibility by the University to approve ethics submissions from undergraduate and taught Masters projects only, which are in the category of notification only.

Examples of projects in this category include:

- Anonymous surveys in which the topic itself is not likely to elicit significant difficulties for the participants, such as: anonymous internet surveys (e.g. Survey Monkey), street questioning.
- Observation (without audio or visual recording) of public settings where privacy would not normally be expected, such as observing people on streets or at sports events.
- Research carrying no risks beyond those of everyday life (as experienced by the intended participant population), such as asking people's opinions about products or services; asking students about educational experiences; monitoring the impact of daily activities.
- Interviews with public figures, professionals or others in their professional capacity regarding their professional activities.
- Analysis of data (e.g. health records) which have had all identifying information removed by the data holder and been provided to the researcher in accordance with data protection legislation.
- Collection of biological samples which are anonymised and do not require invasive techniques (e.g. hair, nails).

If your project is using data from a public repository like Kaggle or is not generating or using any form of personal data then you do not need research ethics approval, you do not need to complete and to submit this form and your project supervisor should indicate this on the project dashboard.

If your project involves collecting or processing personal data which is of a personal nature, you must first complete the DCU online Data Protection training course and review the "Data Protection – Key Points for DCU Researchers" guidance from the Data Protection Unit to assist you in meeting your legal obligations under GDPR and associated Irish law.

Once you have completed this form (if you need to) you should save it as a PDF file, not WORD, and upload it to the your project dashboard before you start gathering data. It will then be read and assessed by two members of the committee and once two members of the committee approve your submission you will be automatically notified by email and your project can start data gathering.

There are strict deadlines for submitting this form for each class group, undergraduate and taught Masters by which your submission must be made and you will be informed of these deadlines by your course board chair or project co-ordinator. If you do not submit by these deadlines then the research ethics committee is not obliged to approve your submission and when that happens and your project is assessed and graded at the end of the year, you will be awarded 0 for that component of your project.

SECTION 1 – GENERAL DETAILS

1.1 Project Title

VeriSocial

1.2 Applicant Details

Name	Student or Supervisor	E-mail
Javier Alejandro Flores Baez	Student	javier.floresbaez2@mail.dcu.ie
Joaquin Escober	Student	joaquin.escober2@mail.dcu.ie
Dr Graham Healy	Supervisor	graham.healy@dcu.ie

Other Investigators: *Including any external to DCU*

Name	School/Unit/External Institution	E-mail

1.3 Key Project Dates

Proposed start date for data collection	Proposed end date for data collection	Proposed project completion date
24/04/2025	27/04/2025	19/09/2025

1.4 Please indicate which academic award

Undergraduate ☒	Taught Masters ☐

1.5 Please confirm the location(s) where the research will be carried out

If research will be carried out abroad, you will need to address the ethical challenges raised by this in Section 3 of your application - consult the Conducting Research Abroad document in the Ethics Resources and Guidelines section of the DCU Research Ethics webpage).

The user testing will be conducted online via Google Forms Survey. Researchers will be based in Dublin, Ireland while tests are held. Participants themselves will be based in Ireland as well.

1.6 Please state what additional permissions may be required to access participants.

Specify from whom the permission is required (e.g. a school Board of Management), and when their written approval will be obtained

N/A

SECTION 2 – PROJECT DESIGN AND METHODOLOGY

Research Overview - Please respect the indicated word counts in the following sections and explain all acronyms in full text the first time they appear.

2.1 Provide a brief description of the research (max 250 words):
Please use lay language, include the scientific/theoretical background of study and a justification as to why this research project should proceed in that context

The project explores user interaction with our platform, VeriSocial, which is designed to promote authentic online communication and raise awareness of AI-generated content. Over the years, as AI advances, we see more examples of our online platforms being plagued by AI generated media / content and social media platforms becoming more vulnerable to misuse of automated bot activity. This can lead to misinformation spread, reduced trust, and a decline in authentic social interactions.

We aim to address both these issues by incorporating a system that detects and filters out AI content and removes Bots from our platform, creating a more trustworthy and genuine online community.

We also aim to increase AI awareness via interactive features such as mini-games that users can participate in to earn rewards. These gamified elements are designed to improve digital literacy around AI and deepen user engagement.

For ethics, it is essential that we conduct user testing in order to test the functionality of our project.

2.2 Please state the aims and objectives of the project (max 200 words)

The aim of this project is to design and develop our prototype social platform, VeriSocial. The project seeks to create a safer and more trustworthy platform, free from AI content and automated bot behaviour. Our primary objectives are as follows:

- Develop and Implement a system capable of identifying AI generated text and images within user posts.
- Design a bot-detection system that flags suspicious behaviour based on irregular patterns such as spamming.
- Build an engaging user interface that includes game-like features to test and increase the user's AI awareness.
- To evaluate and test user interactions with these features and gain feedback on usability and design.

2.3 Please confirm your methods of data collection:
Tick all relevant check boxes and provide details for each one, including any devices used to collect data, and whether the data will be anonymous, potentially identifiable or identifiable at point of collection

Method	Describe briefly
☐ Interviews or focus groups	
☒ Surveys/questionnaires	We will conduct a survey and participants will rate their experience in using our web application. We will ask questions based on the app's Functionality and Design.
☐ Audio/video recordings	

☐ Public observations	
☐ Persons in public office	
☐ Using existing data (incl. secondary data)	
☐ Using human derived material (biological samples)	
☐ Standard tests (educational/personality etc.)	
☐ Standard educational practices	
☐ Other (please specify)	

2.4 Please confirm who the participants on this study will be, including group size and composition:
Include associated demographic characteristics, and state how your proposed sample size was determined (e.g. power analysis)

Participants will focus on young adults.
- A group of 5-10 Participants are planning to take our survey during user testing. According to Nielsen Norman Group, testing with five users can uncover approximately 85% of usability issues. Given this, we believe that a sample size of up to 10 will provide sufficient feedback to evaluate the functionality and user experience of the system, while still being manageable within the scope and time constraints of a student project.

2.5 Please outline your recruitment process, including where you are sourcing participants from and your criteria for inclusion/exclusion:
Where gatekeepers are involved, outline the procedures relating to their involvement

Recruitment will involve students within our:
- Cohorts
- Relative Field of Study
- Students within DCU

Recruitment will involve advertisement via Discord.

2.6 Addressing participant vulnerability – if your participants fall into any of the following categories, please check the relevant tick box/boxes and state below what special arrangements will be made to protect them:
If your participants are not in any of these categories, tick N/A

☒ N/A
☐ Children under 18 years of age
☐ Persons in unequal relationships with the researcher *(e.g. lecturer-student, therapist-client, employer-employee)*
☐ People with a recognised or diagnosed intellectual, physical or mental impairment
☐ People confined to institutions *(e.g. prisoners, residents in 24 hr nursing facilities)*
☐ People who have undergone traumatic or adverse emotional events
☐ People with diminished cognitive ability
☐ Marginalised sections of society

☐ Other (please specify)
Special arrangements:

2.7 Involvement of children under 18 years of age – if your participants are in this category, please confirm compliance with the following:
If your participants are not in this category, tick N/A

☒ N/A
☐ We confirm that we have read and agree to act in accordance with the DCU Child Protection policy and procedures (*as per the DCU Child Protection Unit webpage*)
☐ We confirm that we have put in place safeguards for the children participating in the research
☐ We confirm that we have supports in place for children who may disclose current or historical abuse (whether or not this is the focus of the research)
☐ We confirm that all requirements will be met prior to commencing the research *(e.g. TUSLA Children First Training completed, Garda Vetting in place)*

2.8 Please confirm how the results of the research will be disseminated:
Include a statement on whether the participants will be provided with any information as to the findings or outcomes of the project

The results of the user testing will be included in the final report submission and a formal presentation for examiner view only. Results and findings will be described in general terms for both the final report and presentation as well. This includes the emails being sent to the participants too. Results will NOT be described in a way that specifies or identifies any individual who participated during user testing. (i.e. participants will remain anonymous).

SECTION 3 – ETHICAL ISSUES AND RISK MANAGEMENT

3.1 Please identify all issues including ethical issues which may arise in the course of this research. What are the potential risks to participants, and how will those risks be addressed or minimised?

Potential risks can be physical, psychological, social, legal, etc. Please include details of any additional support being provided for participants during/after the study

The use of our web application will pose no greater risk than would typically result from everyday interactions with computers.

3.2 Please identify the potential benefits (direct and/or indirect) to those participating in this research:

Potential benefits should outweigh the potential risks to participants

No direct benefits to the participants. An indirect benefit can include:

Early Access to VeriSocial

- Participants will gain early access to VeriSocial and will be able to use VeriSocial functionalities before anyone else. They will be able to ask questions regarding our project as well.

3.3 Please describe what measures/protocols you have put in place in the event that there are any unexpected outcomes or adverse effects to participants arising from involvement in the research:

Unexpected outcomes or adverse effects will be discussed and reported to our supervisor.

3.4 Do you intend to provide payment or incentives to participants?

Yes ☐	No ☒

If Yes, please consult the REC Guidelines on the Use of Compensation and Incentives (in the Ethics Resources and Guidelines section of the DCU Research Ethics webpage) before providing additional details below

3.5 Does this research raise any potential risks for the researchers themselves?

Please consider the location/environment where the research is being conducted, exposure to distressing data content etc.

Yes ☐	No ☒

If Yes, please describe further and explain what risk management procedures will be put in place to minimise these risks to researchers:

3.6 Does this research raise any potential conflict of interest?
Please consider any potential real or perceived conflicts of interest that might influence the integrity of the research, or give rise to bias in conducting and reporting the research, or affecting publication (consult the DCU Conflict of Interest Policy for assistance)

Yes ☐	No ☒

If Yes, please identify and explain the steps being taken to address that conflict:

3.7 Please describe how the conduct of the research will be monitored:
Regular oversight by the PI is required to ensure the project conforms to the procedures set out in this application (especially where several people are involved in carrying out the research procedures)

Through regular meetings with our supervisor, all user findings will be shared.

SECTION 4 – CONFIDENTIALITY AND DATA MANAGEMENT

4.1 Considering your previous response in section 2.3 of the form on data collection, please confirm whether you are collecting or processing personal data in this research project:
Personal data is any information about a living person, where that person is either identified, or could be identified from the data itself, or when it is combined with other data. This includes paper based, electronic and biological samples data. If your data is fully and completely anonymous, it is not personal data.

Yes ☐	No ☒

If Yes, please confirm your compliance with the following by ticking the checkboxes:

☐
☐
☐

4.2 Data access – please confirm whether access to participant data is confined to the investigators named on this application:

Yes ☒	No ☐

If No, please name who the other individuals are and why they need access. Any proposed transfer of data (including outside of the EU) should be detailed here.

4.3 Data storage – please confirm compliance with the following:

☒ Data collected on mobile devices will be protected with a strong password/passphrase at a minimum, and/or encrypted if the device supports it
☒ Data will be removed from mobile devices as soon as is practicable and stored in a secured location in DCU (on server or institutional Google Drive)
☒ Paper based data will be held securely in locked cabinets in DCU, with access restricted to the named researchers
Specific arrangements in relation to biological samples should be stated here:
Any exemptions to the above compliance statements should be justified here:

4.4 Please confirm who will be responsible for the secure storage of data generated by the research:
Name the relevant DCU investigator/s

Javier Alejandro Flores Baez

Joaquin Escober

4.5 Please confirm how long the data will be held for:
For personal data, consult section 15: Retention of Personal Data in the "Data Protection – Key Points for DCU Researchers" guidance on the DCU Data Protection Unit (DPU) website

Data will be held until project presentations are held. After which all data will become inaccessible. Presentation dates are from Tuesday 6th to Friday 9th May 2025. All data will be destroyed on May 31st 2025.

4.6 Please confirm what will happen to the data collected at the end of the study:
Please tick the relevant checkbox and complete the associated follow-up section for that category

Archived ☐	Destroyed ☒	Other ☐

4.6.1 Archived data
Please provide the following details:

Name the DCU staff member responsible for archival and future use of data	*N/A*
Confirm whether the data will be made available to other researchers, and if so, how?	*N/A*
Confirm how the data will be prepared for archive (e.g. will datasets be anonymised)	*N/A*
Confirm where the data will be archived and who will be allowed to access it	*N/A*

4.6.2 Destroyed data
Please provide the following details – Note: for student projects, the supervisor must take responsibility for data destruction if there is no guarantee the student will have access to the data at the time of destruction

Please justify why the data will be destroyed	Data will be of no user after project dates. The data will only be used until the end of project presentations
Name the DCU researcher responsible for destruction of data	*Javier Alejandro Flores Baez*
Confirm when the data will be destroyed (specify date)	*31/05/2025*
Confirm compliance with the following destruction methods (tick relevant boxes)	☒ Electronic data will be overwritten/securely deleted ☐ Paper based data will be confidentially shredded ☐ Medical samples will be disposed in accordance with the relevant DCU approved SOP

4.6.2 Other - Please explain what will happen to the data if not being archived or destroyed:

SECTION 5 – PARTICIPANT INFORMATION AND INFORMED CONSENT PROCEDURES

In addition to completing this form you are required to attach, within the single PDF that you submit, a copy of (1) the Participation Information Sheet which you share with your participants and (2) a copy of the Informed Consent Form which your participants sign.

5.1 Please confirm that the following items have been addressed in your Participant Information Sheet which should be shared with all participants whether it involves online or in-person data gathering:

The items below should be used as headings in your information sheet. Note the language used under each item must reflect the participant age group and corresponding comprehension level– if your participants have different comprehension levels (e.g. both adult and child participants) then separate sheets must be prepared for each set. Templates are available via the REC Forms - Applications, Templates and Amendments section of the Research Ethics website.

Checklist – tick the relevant check box for each item	Yes	No
Introductory Statement (Researcher names and titles, school, title of the research study)	☒	☐
What is this research about?	☒	☐
Why is this research being conducted?	☒	☐
Why have you been invited to take part?	☒	☐
What will happen if you decide to take part in this research study?	☒	☐
How will your data be used?	☒	☐
How will your privacy be protected (including any legal limits to confidentiality)?	☒	☐
What are the benefits of taking part in this research study?	☒	☐
What are the risks of taking part in this research study?	☒	☐
Can you change your mind at any stage and withdraw from this study?	☒	☐
How will you find out what happens with this project?	☒	☐
Contact details for further information	☒	☐

If you marked any item as No, please explain and justify why:

5.2 Informed Consent Procedures – please confirm whether written consent is to be obtained:

Please tick the relevant checkbox

Yes ☐	No ☒

If Yes, describe the procedures by which written consent will be obtained. If you are involving child participants, you will also need to obtain their written assent. Templates are available via the REC Forms - Applications, Templates and Amendments section of the Research Ethics website.

If No, describe the procedures regarding how consent/assent will be obtained:

Consent will be obtained in the **Google form** survey via checkbox.

If you are gathering data from an online process such as Google Form or SurveyMonkey then you should use a page such as the one below, to capture participants' informed consent and your data gathering should not proceed until participants have completed this form with the appropriate answers.

Participant – please complete the following (by clicking Yes/No for each question)

I have read the Plain Language Statement (or had it read to me) *

- (●) Yes
- ( ) No

I understand the information provided *

- ( ) Yes
- ( ) No

I have had an opportunity to ask questions and discuss this study *

- ( ) Yes
- ( ) No

I understand the information provided in relation to data protection *

- ( ) Yes
- ( ) No

I have received satisfactory answers to all my questions *

- ( ) Yes
- ( ) No

I understand I may withdraw from the Research Study at any point *

- ( ) Yes
- ( ) No

I have read and understand the arrangements to be made to protect confidentiality of data, including that confidentiality of information provided is subject to legal limitations *

- ( ) Yes
- ( ) No

I have read and understand confirmations relating to any other relevant information as indicated in the PLS *

- ( ) Yes
- ( ) No

I consent to participate in this research study *

- ( ) Yes
- ( ) No

SECTION 6 – SUBMISSION CHECKLIST AND RESEARCHER DECLARATION

6.1 Please confirm all required supplementary documentation to be included in this application within Section 7:

Checklist – tick the relevant check box for each item	Yes	N/A
Participant Information Sheet/s	☒	
Informed Consent Form/s	☒	☐
Informed Assent Form/s	☐	☒
Recruitment Advertisement	☐	☒
Questionnaire/Survey	☐	☒
Interview/Focus Group Questions	☐	☒
Debriefing Material	☐	☒
Bibliography	☐	☒
Approval from another Research Ethics Committee	☐	☒
Evidence of other external approvals (e.g. Board of Management letter)	☐	☒
Evidence of internal approvals (e.g. BSC approval review letter)	☐	☒
Other – provide details here:	☐	☒

6.2 Signed Declaration

By submitting this form, the applicant (and supervisor) agree to the following:

The information contained herein is, to the best of my knowledge and belief, accurate. I have read the University's current research ethics guidelines, and accept responsibility for the conduct of the procedures set out in the attached application in accordance with the form guidelines, the REC guidance and resources, the University's Conflict of Interest Policy, its Code of Good Research Practice and any other condition laid down by the Dublin City University Research Ethics Committee. I have attempted to identify all risks related to the research that may arise in conducting this research and acknowledge my obligations and the rights of the participants.

I also acknowledge my requirement to be informed as to other duties and legal obligations applying to my research, and to comply with these duties and obligations – this includes being informed about DCU Data Protection guidelines for researchers, DCU Child Protection policy and procedures (where relevant) and DCU Insurance requirements.

I and my co-investigators and/or supporting staff have the appropriate qualifications, experience and facilities to conduct the research set out in the attached application and to deal with any emergencies and contingencies related to the research that may arise. Research will not commence until required consents and approvals are in place.

Electronic Signature(s):

Supervisor: _____Graham Healy_____

Print Name here:_____GRAHAM__HEALY_____

Date: 24/03/2025

Student(s) signature(s):____ _____
Print Name(s) here:_ Javier Alejandro Flores Baez and Joaquin Escober_____

Date: 24/03/2025

SECTION 7 – SUPPLEMENTARY DOCUMENTATION

Please attach all required documentation as confirmed by you in the previous section. The application should then be saved as one file in PDF format before submission via the project dashboard.

Participant Information Sheet

DCU
Ollscoil Chathair
Bhaile Átha Cliath
Dublin City University

DCU Research Ethics Committee
Participant Information Sheet Template (approx. 400 words)

Introductory Statement
VeriSocial is a 4th year project developed by DCU Computer Science Students: Javier Alejandro Flores Baez & Joaquin Escober.

What is this research about?
VeriSocial is an online web application that aims to filter out AI-content and Bot activity found in modern social media. Our platform aims to promote authentic human interaction and create safer and more trustworthy digital environments.

Why is this research being conducted?
We require participants to test the usability and design of our web application. Researchers would like to find out if the delivery of our features are working as intended and if our app is designed in such a way that users are able to easily use said features.

Why have you been invited to take part?
You have been invited to participate in this usability study because you are young adult and one of the following:
- Within our cohort
- Within our relative field of study (Computer Science).
- Within DCU or from other Universities.

What will happen if you decide to take part in this research study?
Participants will be asked to use our web application for 10 minutes, in which they will complete a series of tasks such as logging in or creating a post. Participants will then be asked to complete a survey regarding their experience in using the VeriSocial web application. The user testing and survey will last a maximum of 15 minutes altogether.

How will your data be used?
All data will be stored in a personal server and will be held until project demonstrations are over. After which all data will become inaccessible. Demonstration dates are from Tuesday 6th to Friday 9th May 2025. All data will be destroyed on May 31st 2025.

Javier Alejandro Flores Baez will be responsible for handling and processing the data. The DCU Data Protection Officer - Mr. Martin Ward can be contacted data.protection@dcu.ie. Any concerns regarding data can be directed to the DCU protection officers.

The reason(s) for which the data will be processed or held.
- To test the functionality and design of our web application.

The categories or types of personal data to be processed.
- Users will be required to make usernames and passwords.
- Users will be required to make posts which include text and / or images.
- Users will provide their feedback based on their experience using the application.

Data will only be collected and used by the project researchers. No data will be shared with any third parties OR non-DCU parties.

Data will remain inside of Ireland or Europe. Data will NOT be transferred outside these regions.

DCU
Ollscoil Chathair
Bhaile Átha Cliath
Dublin City University

DCU Research Ethics Committee
Participant Information Sheet Template (approx. 400 words)

Data will only be held from the start of the usability testing (14th April 2025) till the end of the Project Demonstrations. (6th-9th May 2025). All data collected will be destroyed on May 31st 2025.

Participants have the right to lodge a complaint concerning the use of personal data Irish Data Protection Commission.

Participants have the right to be able to access their data. Data can be requested via emailing the project researchers. (javier.floresbaez2@mail.dcu.ie and joaquin.escober2@mail.dcu.ie). Upon emailing the researchers, a response containing a copy of data submitted by the participant during the testing period will be returned.

Data will NOT be used for future development of the project (after project deadline) nor will it be used for any future research.

All contributed data will remain anonymous. All data when processed will be described generally in the final report and demonstrations of the project. No one participant will be specified when describing the results.

How will your privacy be protected (including any legal limits to confidentiality)?
At any point in time during or after the research project, participants are able to request to take down their data from the application. All participants will remain anonymous. After project presentations, all collected data from the web application and participant feedback, will be destroyed (May 31st, 2025).

Please note that confidentiality of information can only be protected within the limitations of the law - i.e., it is possible for data to be subject to subpoena, freedom of information claim or mandated reporting by some professions.

What are the benefits of taking part in this research study?
Early Access to VeriSocial:

- Participants will gain access to VeriSocial's platform and be able to use its functionalities before anyone else.

Influence on Design / Development

- Feedback can greatly influence the design and functionality of the platform. This allows us to develop our project in a way that suits our intended audience and their preferences.

What are the risks of taking part in this study?

Participants may worry about their data being misused or would like them to not be stored.

- Participants can request to take down their data during any time of the research or after.

The use of our web application throughout the study will pose no greater risk than would typically result from everyday interactions with computers.

Can you change your mind at any stage and withdraw from this study?
Participation in this research is voluntary. The participants at any stage of the research are freely able to withdraw from the study should they wish to. Participants are also able to request to remove their contributed data from the project at any time during the research.

Bhaile Átha Cliath
Dublin City University

DCU Research Ethics Committee
Participant Information Sheet Template (approx. 400 words)

How will you find out what happens with this project?
Participants will be contacted via email at the end of project presentations.

Contact details for further information:
Emails of researchers:
- javier.floresbaez2@mail.dcu.ie
- joaquin.escober2@mail.dcu.ie

If participants have concerns about this study and wish to contact an independent person, please contact: The Secretary, Dublin City University Research Ethics Committee, c/o Research and Innovation Support, Dublin City University, Dublin 9. Tel 01-7008000, e-mail rec@dcu.ie

User Consent Form

VeriSocial User Concent Form

VeriSocial is a unique social platform designed to prioritise authentic human interaction. With the rise of artificial content and automated bot interactions, the online experience becomes plagued for the everyday user, which dilutes their overall experience. VeriSocial addresses this issue by providing a space for users and implementing a system that detects and filters out AI generated content or bot activity. This allows users to confidently browse and connect with others knowing that every piece of media or interaction is authentic and human.

What will happen if you take part?

If you decide to take part, you will be given access to VeriSocial. You will use the app for a week, before you get sent the user testing form. This form will be used to see how on track with our mission statement VeriSocial is, and receive any feedback on the current state of VeriSocial.

For information on the study please refer to the participant information sheet below:
- Participant Information Sheet

For any question please email either Javier or Joaquin at:
- Javier: javier.floresbaez2@mail.dcu.ie
- Joaquin: joaquin.escober2@mail.dcu.ie

You must be over 18 to take part in this study.
